Welcome to the NRV Model wiki!

This wiki serves as the user's guide for the NRVMPPO travel model. The list of pages to the right break up the guide into sections. Most likely, "Installation" is where you want to start.

It is important to note that this user's guide was designed for model users, not model developers. Model developers will likely desire more detail than what this document provides. This detail can be found in the model development documentation. This documentation will be located in the "docs" folder of this repository.
